BEAUTYSTREAMS

Cosmo Vision 2023-2028: Celebrating otherness

Celebrating Otherness highlights what makes an individual special, and embraces all uniqueness, even outside the mainstream. As the definition of globalization is evolving, diverse cultural influences and unique points of view will shape the beauty industry and consumption patterns in the upcoming years. Driven by consumers' desire for customized services and products, the "one-size-fits-all approach" will gradually disappear in favor of hyper-personalization and true cultural understanding, hence local adaptation. Future consumers will be increasingly inclusive and place value on what makes each person unique. Every aspect of a demographic – from personality to preferences and needs, cultural affinities, sexuality, gender definition, and age – will play into the definition of an individual.

Join BEAUTYSTREAMS for this exclusive seminar and discover five not-to-miss lifestyle shifts linked to inclusivity that will shape the future of the beauty industry.

FORUM

In cooperation with:

What's up with SEA beauty?

South East Asia is more than ever a zone with active developments in all beauty categories. Thailand consumers are hungry for efficient skincare and colorful makeup, Indonesia powerful local brands are shaping the landscape of beauty from skin to body care. Smaller countries like Singapore and Malaysia focus on top-notch innovations & new natural / sustainable concerns. S.E.A is currently at the crossroads of many influences, from K-beauty to western Tiktok trends, but always imposing its own identity whether it is halal certified beauty, climate-related hybrids...

In order to understand better these market specificities, let us take a look at the latest trends & newest products – and see where the markets are going next.
